If you want can click on **Explore Slack** to take a tour.

Otherwise click on **skip the tutorial** link present at the bottom.

Step 7:

You will see following window which means your slack is all set. 😊

Exploring Slack:

Please refer last diagram's left panel to see Channels, Direct Messages and Private Groups.

1) Channels:

"Channels are for conversations that are open to your entire team. All messages posted to channels are archived and searchable for all team members, except Restricted Accounts and Single-Channel Guests."

You can join existing channels or create new ones and invite people into it.

Channels is the best way to discuss your common problems (NOT Assignment solutions).

2) Direct Messages:

"Direct messages (DMs) are useful for private, one-on-one conversation between two team members. These conversations are visible and searchable only to you and the person you DM with."

You can message directly to a person visible in Direct Messages section.

3) Private Groups:

"Private groups are best used for subjects that are sensitive or confidential, or limited to a small group of team members. A group and its contents are visible and searchable only to group members."
